

1 **ABSTRACT OF THE DISCLOSURE**

2 A golf club head has a bottom face having a periphery formed with
3 an arc-shaped face. The bottom face of the golf club head has a center formed
4 with a receiving recess for receiving an elastic bushing. The receiving recess
5 has a determined slope and has a width slightly greater than the diameter of the
6 golf ball. Thus, the golf club head can be used to pick up the golf ball, so that
7 the user can directly pick up the golf ball without needing to bow, thereby
8 facilitating the user picking up the golf ball.
